

LUBRICANTS FOR MACHINING

SOLUBLE LUBRICANTS

Synthetic base

CONDACOOL

CONDACOOL high performance solutions (oil-free) combine optimized lubrication and ease of use for operators.

Vegetable base

MECAGREEN

Formulated from renewable esters selected for their optimal polarity, the MECAGREEN solubles combine performance and environmental responsibility.

Mineral Base

POLYBIO

The POLYBIO range of soluble oils combines robustness and versatility, without compromising on user protection.

BENEFITS:

Improving the quality of parts:
- Surface condition
- Geometry
- Reduction of waste

Increased productivity:
- Reduction in machining time
- Stability of cutting conditions

Cost reduction:
- Tools
- Lubricant
- Waste

Neat Oils

Vegetable base

NEAT GREEN

NEAT GREEN lubricating oils are composed of lubricating esters of renewable origin for optimal lubrication of your operations. They offer high performance lubrication and reduced HSE impact.

Refined Mineral base

CONDACUT X

CONDACUT X products are formulated from refined, low volatility mineral oils. They contribute to the improvement of the air quality in the workshop while providing superior lubricating performance.

Mineral Base

CONDACUT

CONDACUT products incorporate additive packages optimized for the lubrication of each type of operation.

BENEFITS:

Optimum part quality:
- Surface condition
- Geometry
- Reduction of waste

Oxidation stability:
- Extended bath life
- Durable cutting performance
- Reduction of consumption

Improving air quality:
- Mist reduction
- BaP/HAP limitation
