

WAYPURE®

Eliminate rancid coolant odors

Innovative way lubricant

WAYPURE® is an innovative lubricating oil chemistry designed to optimize ALL coolants performance no matter whom the manufacturer.

A real succes

THOUSANDS of customers have experienced the **WAYPURE** advantage in machining centers across North America for more than 20 years!

WAYPURE® stops ODOR problems like the ones you can have Monday morning in your coolant sump!

NO ZINC
NO PHOSPHORUS
NO SULFUR

How can WAYPURE® save you MONEY?

Extends Coolant Life :
Less down time for DCR's, Lower disposal costs, lower coolant consumption.

Machinability :
Will not leach important additives out of the machining coolant, therefore maintains the integrity of the cutting fluid in the sump.

Machinability :
WAYPURE® is EPA friendly. It doesn't contain conventional extreme pressure additives (heavy metals) such as phosphorus, sulphur, and zinc.

Clean :
WAYPURE® cleans out the build up that conventional oils leave behind in both lines and check valves allowing for better way lubrication and less maintenance.

Testimonials

A manufacturer of Stainless Steel food processing equipment in Northern Ohio made the change to **WAYPURE®** about one year ago. This customer, only changing the way lubricant, has extended the soluble oil coolant sump life 2-3 times. The coolant life was extended from 3-4 months to now almost a full year. They are seeing the **WAYPURE®** difference in extended coolant life, lower coolant consumption, less downtime for cleanouts, and low waste disposal costs.

10-year customer Kevin Demott at Black Clawson Converting Machinery made the switch to **WAYPURE®**. Kevin was cleaning both the injectors and check valves on a routine basis prior to using **WAYPURE®**. Since Kevin made the change he has not had any plugged lines, check valves, or injectors.

CONDAT

PROVIDING INNOVATION TO YOUR INDUSTRY

HYDRAPURE

HYDRAULIC OIL

derived from similar innovative chemistry as **WAYPURE**®!
HYDRAPURE provides same advantages as **WAYPURE**
in cases were you have hydraulic oils leaking into your coolant.

A COMPLETE RANGE

A wide range of viscosity available

GRADES	32	46	68	100	220
WAYPURE® Way lubricant	■		■	■	■
HYDRAPURE Hydraulic oil	■	■	■	■	

These fluids are easy to use.

Just top them off over your present fluid and start to see a difference in just a few short weeks.
