POLYBIO

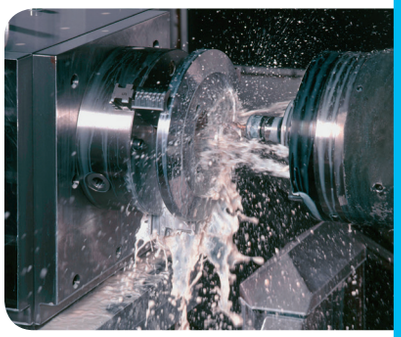

Soluble Oil

Mineral Base

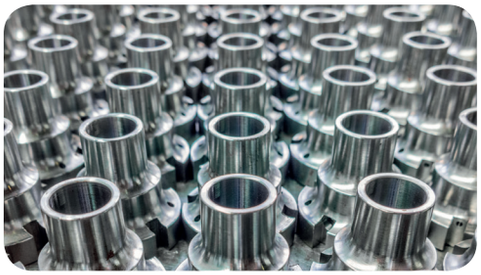

MINERAL BASED WATER SOLUBLE FLUIDS

MACHINING

Formulated from the latest technology in semi-synthetic metalworking fluids, the CONDAT Polybio range includes a broad spectrum of fluids suitable for everything from light duty machining, to heavy duty operations such as drilling and tapping Nickel alloys. CONDAT is constantly striving to improve its machining fluid technology with the latest advances in high performance machining lubricants for manufacturing.

CONDAT Technology

The CONDAT POLYBIO range includes a broad range of products to meet your specific operation needs and requirements:

Multi-material:
- Steel
- Cast iron
- Aluminium
- Copper based…

Multi-operation:
- Resurfacing
- Bar turning
- Drilling
- Trimming…

High performance

The CONDAT POLYBIO range can significantly improve your process and decrease your net cost of operation:

Improved part quality:
- Surface condition
- Geometry
- Reduced waste…

Increased productivity:
- Reduced cycle time
- Cutting condition stability…

Reduced costs:
- Tools
- Lubricant
- Re-processing

Improved working conditions

The POLYBIO range anticipates future legislation and requirements by including products that meet all your highest health and safety requirements.

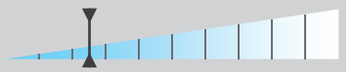

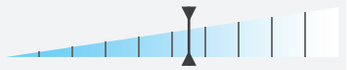

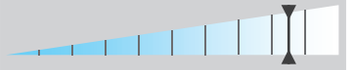

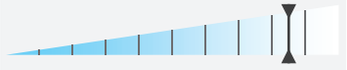

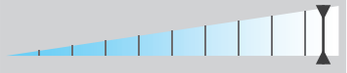

Advantages:
- Dermatitis risk prevention
- Boron and/or Amine free formulas

Focus on POLYBIO 650 ABF

Formulated to provide the best cutting performance on the most demanding alloys, POLYBIO 650 ABF has a reduced impace on HS&E concerns (amine and boron free), it provides outstanding lubrication for high surface finish requirements and tool life improvements. POLYBIO 650 ABF has shown decreased product usage with it's ability to sheet off parts and chips better, resulting in less makeup required in use.
